Arrowhead Systems, Inc. Announces Technology Acquisition with CCH Engineering – Carlisle, UK

January 15, 2010 - Arrowhead Systems Inc. announces that it has acquired the proprietary can conveying and can handling technology from the UK based, CCH Engineering, Carlisle, Cumbria UK. The technologies are used primarily in can manufacturing facilities worldwide. CCH Engineering is a global leader in the sale and install of turnkey can making plants.

Pat Vincent, President and COO, of Arrowhead Systems Inc said “our Busse unit is the preeminent and premier supplier of palletizer systems in the world; the CCH technology, added to our Arrowhead Conveyor Group enhances and strengthens our ability to supply total systems and turnkeys to our global can making customers. Palletizers, robots, air conveyor, mass and specialty conveyor, storage and retrieval systems give an integrated system of World Class quality and performance to our customers.”

Arrowhead Systems, Inc., an industry leader, specializes in material handling equipment and packaging line integration. The companies of Arrowhead Systems, Inc. (A & B Engineering Services LLC, Arrowhead Conveyor Corporation, Busse/SJI/Priority One Corporation, and NeXtconveyor Corporation) are located in Wisconsin and have the added support of a network of Direct Sales Professional and Authorized Dealers and Representatives across the United States and Global.
